

## ASE5300-TR

SiPass®  
integrated

### Time recording export license

- 
- Automatic export of clock-on and clock-off data to file
  - Eliminates redundant data entry

The ASE5300-TR time recording export software enables advanced time-handling for employees with access cards. It is possible to use the system to register when employees arrive for work and leave at the end of the day, then have this data exported to an external file. This file can then be used for time-keeping records or payroll systems.
